

New Studio energies

R 30,000.00

New Studio Energies speaks to the ethos that there is a universe inside you, through the living genetics that we call our ancestors.

Our spirituality is indeed a scientist through an African lens of biogenetics/Epigenetics and that is how the people live within us and inspire

us because as humans we’ve always been conscious beings and not only physical beings.

We inherit conscious information and not only physical information.
